Redux DevTools

Now that you have your NgRx in full bloom, let us take a look at what Redux in Action with Redux DevTools

Let's install Redux DevTools in three easy steps so we can take a look under the hood

- Install browser extension

- Chrome extension: 'redux devtools'

Firefox add-ons: 'redux devtools'

- Install @ngrx/store-devtools

```
> npm install @ngrx/store-devtools
```

- Initialize @ngrx/store-DevTools module

```typescript
import { StoreDevToolsModule } from '@ngrx/store-devtools';

@NgModule({
imports: [
        ...
        StoreDevToolsModule.instrument({
            name:'App Demo DevTools',
            maxAge: 25 ,
            logOnly: environment.production,
        }),
        ]
})
```

app > app.module.ts

You can now take advantage of some of the advantages inherit to NgRx through the your Web Developer Tools like:

- You can now get a visualization of your state tree

- Have a history of your state changes

- Debug by undoing and redoing state changes

Advanced logging
